

Emgold Mining Corporation is a precious and base metal exploration company focused on Nevada and Quebec. The Company's strategy is to look for asset acquisitions in a buyer's market, add value to the acquisition through computerization and remodeling of historic exploration data, new exploration, and the application of modern geophysics, and seek asset divestitures through sale, joint venture, option, royalty, or other business transaction to advance our projects and create value for our shareholders.

Business Model (A&D)

Why Nevada and Quebec?

- Stable permitting, exploration, and mining jurisdictions
- World class deposits and mines
- NV is ranked #3 and QC is ranked #18 in Fraser Institute's 2019 Survey for attractiveness for mining investment
- In 2018, NV produced 5.8M oz. Au, 83% of US production and QC produced 2.0 M oz. Au, 34% of CDN production
- Quebec offers competitive tax incentives for exploration
- Excellent geology and potential for discovery, acquisition, enhancement, and divestiture of projects

Emgold's business model is based on acquisitions and divestitures common in the real estate business. The Company looks to acquire undervalued assets, add value through exploration, and to move to quickly monetize assets through divestiture – the analogy is to hit singles, doubles, triples, and home runs with **multiple opportunities**, rather than focus on one core asset and the goal of taking it to production.
